

INFORMATION ABOUT THE IMPACT ON HUMAN HEALTH AND THE ENVIRONMENT

LG Energy Solution Wrocław sp. z o.o. with its registered office in Biskupice Podgórne ("Company") in order to fulfill the obligation referred to in Art. 32c section 2 of the Atomic Law of November 29, 2000, informs that in 2023 the Company conducted activities related to exposure consisting in the use of devices generating ionizing radiation and the use and operation of devices containing radioactive sources, i.e.:

- X-ray machines for bags and parcels at personal inspection points when leaving the Company's production plant;
- CT scanners for analyzing material defects in laboratories and production quality control points;
- thickness and mass meters used in production lines in the areas of Electrode 1, Electrode 2 and Electrode 3.

At the same time, the Company informs that its activities related to exposure, consisting in the use of devices generating ionizing radiation and the use and operation of devices containing radioactive sources, in the last year and previous years, did not have any impact on human health or the environment, and no releases were recorded radioactive substances into the environment in connection with the performance of this activity.
